Subject: Re: 12RFO RV Head Inspection - Bulletin 2001-01 response

Date: 8/22/2001 13:2541010

I think we need to make sure what 90% inspected means. Does this 90% inspected means prior to cleaning the head o after the head was cleaned. I would think prior to head cleaning. Andrew please clarify.

12RFO RV Head Inspection

2001-01 response

In response to questions I have received concerning the definition of the "majority of the nozzles" that were inspected during 12RFO, Andrew stated that approximately 90% were inspected. This will be used in the Bulletin response.
