1 than ones you had seen from other utilities?

2 A Yes, more Boron was visible on the  
3 head.

4 Q Were people asking questions about  
5 that?

6 A I don't recollect, but I don't, my  
7 impression, coming away from it, was there was  
8 Boron on the head, it was from flange leaks,  
9 and the plant had had a continuous history of  
10 flange leakage issues, and that was the source  
11 of the Boron.

12 Q And Mr. Geisen was the only one  
13 from Davis-Besse there?

14 A Yes, that's my recollection.

15 Q Do you recall whether he expressed  
16 some frustration at the quality of the videos?

17 A I think he did, mainly about the  
18 2000 video.

19 Q What do you recall about that?

20 A I recollect a statement along the  
21 lines of, you know, that, "If you think the  
22 '98 video is hard to see, hard to interpret,

1 then the 2000 is even more difficult."

2 Q Was he right?

3 A At that point in time, I didn't  
4 know if he was right or wrong.

5 Q I mean, did you look at the 2000  
6 video?

7 A No, we did not.

8 Q Do you know why?

9 A It didn't appear to provide us  
10 with any additional information.

11 Q And that was based upon his  
12 statement? I mean, did he turn it on and show  
13 you?

14 A No, I don't believe he ever  
15 inserted a tape from it.

16 Q Did that strike you as peculiar?

17 A No, at the time, I don't believe  
18 it did.

19 Q Did it later?

20 A Not until -- no. I don't know. I  
21 mean, it may seem like something we would have  
22 considered but . . .
