REMARKS: IMC 2515 (Light-Water Reactor Inspection Program—Operations Phase) has been revised to incorporate Executive Director (EDO) for Operations Field Policy Manual guidance related to: No. 8 - Resident Inspector Relocation Policy, No. 13 - Witnessing Unsafe Situations, No. 18 - Guidelines for Assigning Resident Inspectors to Reactor Sites and Granting Exceptions to the Policy, and No. 19 - Guidance for Recommending Third Party Assistance to Licensees. No new inspection guidance or policy is implemented through this change since the policy and guidance previously contained in the EDO's Field Policy Manual were incorporated verbatim.
