The U.S. Nuclear Regulatory Commission's Advisory Committee on Medical Uses of Isotopes (ACMUI) will meet Oct. 19 to 20 in Rockville, Md., to discuss, among other items, an International Commission on Radiological Protection publication; the updates on permanent prostate brachytherapy medical events; and an update on results from the Society of Nuclear Medicine on the medical isotope shortage. Other agenda topics include: the medical uses of radium-223; information on the regulatory responsibilities of the U.S. Food and Drug Administration and a summary of the enforcement process and enforcement actions against medical licensees; review of the new security regulations in 10 Code of Federal Regulations (CFR) Part 37 and the potential changes to Part 35—medical use of byproduct material.

The ACMUI advises the NRC on policy and technical issues related to the regulation of medical uses of certain radioactive materials.

The public portion of the meeting will be on Monday, Oct. 19, from 10:15 a.m. to 4:45 p.m. and Tuesday, Oct. 20, from 8 a.m. to 12 noon. A detailed agenda is available at <http://www.nrc.gov/reading-rm/doc-collections/acmui/agenda>.
