Subject: Palo Verde Nuclear Plant

Good afternoon –

I had an opportunity this morning to review the letter and maps you sent yesterday. If I am not mistaken, the transmission line shown in Figure 3-2 and 3-3 is the Palo Verde to Devers line. Is this the one that was recently divided into two actions, one for CA the other for AZ due to AZ not allowing the project to move forward? I became involved in the project after FERC and am now getting caught up via BLM. Or, is this another line that is already existing?

Also, is the North Gila transmission line referenced on page 2 the existing line leading into the Yuma substation? If a new line is proposed, or upgrades are necessary, please let me know so that I can inform the Cultural Committee.

Any information you can provide regarding the lines would be greatly appreciated. I look forward to hearing from you.
