September 27, 2009

Dear Sirs,

This letter regards the medical byproducts license being requested by Twin Rivers Medical Center. I am aware the facility has designated me as a Radiation Safety Officer on their license application.

I am currently RSO on the following license using radioactive materials for nuclear procedures:

Poplar Bluff Regional Medical Center
Poplar Bluff, MO
USNRC lic. 24-16652-01

Kennett HMA, Inc has a relatively small nuclear medicine program. I will be visiting the facility at least quarterly for several hours to perform a review of the radiation safety program. Additionally, I will have opportunities to visit periodical due to other business in the vicinity. I am available by phone 7 days a week, 24 hours a day. If an emergency involving radioactive materials occurs, I will be on site at 1301 First Street Kennett, Missouri within 90 minutes. During the travel time to the facility, I will be working with Daryl Wyatt, Chief Nuclear Medicine Technologist assess the emergency, form a plan and directing Mr. Wyatt until I am on site.

On average, I expect to spend approximately two (2) hours per month engaged in Radiation Safety issues at this Kennett HMA, Inc.

Should you have any questions, please call me at 901-262-7117.

Sincerely,

Jim Smith
