

September 23, 2009

To: United States Nuclear Regulatory Commission  
Region 3

Attn: Patricia Pelke  
Material Licensing Branch Chief

Ms. Pelke,

Good morning. The address in condition 10 of our license has changed due to the elimination of the rural route by the post office and has been replaced with an actual street address. The physical location of the facility where the materials are located remains the same. Our current license number is **13-32272-01**. The old address shown in "condition 10" of this license is Route 3 Lyles Station Road, Princeton, IN. The new address in "condition 10" needs to read **2579 West Gibson Coal Road, Princeton, IN 47670**. The mailing address shown in the "Licensee" field on the license remains the same. Please make the proper changes and send a copy of the amended license. Please feel free to contact me by one of the means shown below if there are any questions or concerns. Thanks and have a great day.

Regards,

A handwritten signature in blue ink that reads "John Spears".
