70-925  
SNM-928, Amendments Nos. 71-3 through 71-6

Kerr-McGee Corporation  
Kerr-McGee Building  
Oklahoma City, Oklahoma 73102

Attention: Mr. G. E. Waller  
Nuclear Division  
Licensing and Regulation

Gentlemen:

Enclosed are Amendments Nos. 71-3 through 71-6 to Special Nuclear Material License No. SNM-928, authorizing the delivery of special nuclear material to a carrier for transport in the packages identified as OR-5, OR-8, OR-12, and OR-30, respectively. These amendments constitute a superseding license to deliver special nuclear material in the form of uranium hexafluoride to a carrier for transport. The limited exemption (insofar as it applies to the license to deliver uranium hexafluoride to a carrier) granted by Section 71.12, 10 CFR 71, by filing an application within the 3 month period after the effective date of the regulation, expires upon issuance of this superseding license. This does not, however, affect the limited exemption for packages previously approved for other forms of special nuclear material.

Please note Amendments Nos. 71-3, 4, and 5, through the provisions of Condition 6, extend existing approvals for the delivery of uranium hexafluoride to a carrier for transport until August 31, 1968. This is to provide a limited period of overlap of approvals for procurement of the insulated Oak Ridge packages. Also note that these amendments do not authorize the transport of special

JUL 5 1968

nuclear material. Such transport is normally subject to regulation by the Department of Transportation (DOT). Questions regarding their requirements should be directed to the DOT.

Very truly yours,

Donald A. Nussbaumer, Chief  
Source & Special Nuclear Materials  
Branch  
Division of Materials Licensing

Enclosures:  
As stated

cc: Mr. William A. Brobst
