Subject: FW: Moore Ranch project, Campbell County

Hi: I thought this was sent for placement in ADAMS but I can't find a record. Please do so under "Section 106, 10/2009" and send me the ML#. Thanks

Mr. Behram,

I just received a phone call from Mr. Winter at Uranium One who informed me that the report was submitted to our office in 2007. So yes, the document is in our possession and does not need to be re-submitted.

I look forward to receiving the NRC's determinations of report adequacy as well as site eligibility and project effect so I may begin my review.

Sincerely,

Richard L. Currit

Mr. Currit:

I am the project manager for Moore Ranch with the Nuclear Regulatory Commission (NRC). We initially informed you of this in situ uranium recovery project in April 2008 and are now following up. The proponent of the project is Uranium One and Mike Griffin of their staff informed me that they had submitted documentation to the SHPO to determine eligibility for cultural resources discovered during their survey of the site.

Apparently such consultation is to be accomplished by the federal agency involved with the project and I propose to formally commence this process by sending the SHPO a letter. Please confirm that the needed documentation is in your office's possession, so that it does not have to be resent.

Thank you,

Behram P. Shroff
