

RIRP Pilot Project Proposed Closure Plan Statement

CLOSURE PLAN

A "closure plan" is a general statement of all actions necessary and sufficient to close a regulatory issue. It identifies the implementation and documentation options available to organizations within the issue's scope of applicability. Affected organizations adapt the closure plan to accommodate the plant-specific design and licensing bases.

Gain NRC endorsement of an Industry assessment strategy for inaccessible or underground power cable circuits within the scope of Generic Letter (GL) 2007-01 that will provide reasonable assurance that power cable circuits can perform their intended design function.

Using the endorsed Industry assessment strategy will provide reasonable assurance that inaccessible or underground power cable circuits within the scope of GL 2007-01 in long-term, wet environments are capable of continuing performance of their design functions.
