**SUBJECT**

Control No. 318138- Re - Amendment request for renewal of License No. 13-32182-01, by application and cover letter, both dated April 27, 2009 (submitted by facsimile on April 28, 2009), regarding moisture/density gauges.

---

**SUMMARY**

In our telephone conversation, the following items were discussed:

1. I related that his license renewal application on NRC Form 313 and cover letter, both dated 4-27-2009, and sent to us by facsimile on 4-28-2009, meet the timely renewal criteria but do not provide sufficient information for us to issue the renewed license. This is due in part to changes made in the licensing guidance document for portable gauges (NUREG-1556, Vol. 1, Rev. 1, Program Specific Guidance About Portable Gauge Licenses", dated November 2001). This document is the current guidance document we use in evaluating license applications for applicable information and acceptable commitments needed to renew a license. In the interest of minimizing the efforts of all involved in the license renewal process, It was discussed and agreed that you submit (as additional information) for your license renewal application, Appendix A (NRC Form 313) and the check list format as presented in Appendix B (Suggested Format for Providing Information Requested in Items 5 through 11) of NUREG-1556, Vol. 1, Rev. 1, dated November 2001. Also, please note that each make and model of gauge requested should be specified in the application. If no Californium-252 sources are possessed, please check "No" next to Californium-252 in Appendix B.
2. Also, in Item 10 of Appendix B, under "Radiation Safety Program-Maintenance" please be sure to address both "Non-Routine Maintenance" as well as "Routine Cleaning and Lubrication".
3. Also, in accord with our current security related criteria, requiring that possession limits to be place on a license for each radionuclide possessed, please indicate the possession limit you are requesting for Cs-137, Am-241 and Ra-226.
4. I noted several apparent discrepancies (or changes) in the licensee name and address in what was indicated on the NRC Form 313 and cover letter, both dated April 27, 2009, vs. the information on the current license (Amendment No. 06, dated November 13, 2008) for the licensee name, mailing address and location of use (License Condition 10). Please assure that the information provided on your resubmitted NRC Form 313 is exactly that which should be designated in License Items 1 and 2, and License Condition 10 of the license as renewed. This includes use of "and" vs. "&" and "dba" vs. "d/b/a".
5. I noted that the renewal application dated April 27, 2009 did not request temporary job site use of the portable gauges in Item 3 of NRC Form 313 but should do so in the resubmitted NRC Form 313, if that authorization is wanted in the subject license as renewed.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this conversation record will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

---

ACTION REQUIRED

Please **provide, as additional information to Control No. 318138**, responses to the items requested above. Please **send responses to me by facsimile (630-515-1078)**. **No followup hard copy is needed. Please call me at 630-829-9829** with any questions **and as soon as you have sent response**. Please respond by October 5, 2009.
