Re: Control Number 318539, Additional information for amendment to License No. 21-26543-01, West Michigan Heart, P.C.

1. West Michigan Heart, P.C. has used only Tc-99m and Tl-201 radiopharmaceuticals at the 5900 Byron Center Ave SW, Wyoming location. In addition, they used Cs-137, Ba-133 and Co-57 sealed sources for calibration.
2. Regarding the exposure rate survey on the closeout: I performed exposure rate surveys in each of the rooms designated as areas of use of radioactive materials. None of the areas surveys measured exposure rates higher than the background exposure rate of 0.01 mR/hr.

If you have any questions, please contact me at 616-583-0475.

Sincerely,

Dawn Edwards, M.S.
