RE: Docket #70-7015

Dear NRC Staff:

I represent District 31 which is comprised of Bonneville, Teton, Caribou, Bear Lank, and Franklin counties. I want to pledge my upmost support to the AREVA Enrichment Services LLC license application to construct the Eagle Rock Enrichment Facility.

I believe that Idaho and the United States economic future depends on the development and use of nuclear power. Nuclear power offers a safe carbon free alternative to our future power needs.

Bonneville county and Idaho offers a qualified work force that has a history of providing the labor that the National Laboratory has needed for the last 60 years.

I look forward to reviewing the environmental studies that will be required. AREVA has shown a willingness to be a good corporate neighbor and the licensing process must be expedited so that this project can be built. We need the jobs that will be created in the construction phase as well as the permanent jobs that it will require.

Like the U.S. economy, Idaho also needs the jobs that this project will create. Our energy needs long into the future will be added by the project.

Sincerely,

Rep. Marc Gibbs
