Subject: Acceptance Review of 2009 Surety Update Request

Mr. Corte,

By letter to the U.S. Nuclear Regulatory Commission (NRC) dated September 8, 2009, Western Nuclear, Inc., submitted an application for an amendment of NRC license number SUA-56 to adjust the surety.

The NRC staff has completed its acceptance review of your application for a surety adjustment and identified no significant administrative omissions or major technical deficiencies. Therefore, this request has been accepted for formal review. Please note that an acceptance review does not constitute a complete technical review, and that a technical review may identify omissions in the submittal that may require additional information.

If you have any questions, please do not hesitate to call me.

Regards,

Richard Chang
