Subject: Cm sorption values
Attachments: 00818040.pdf

David,

Here's a copy of what I sent to Ron, but with the cited article attached as a pdf. It's a general article but informative nonetheless.

Paul

Ron,

Please use Cm sorption values (Kds or Rds) that are equivalent to the values used for Am. This is consistent with values used in other portions of TPA 4.1 and is consistent with recent summaries of Cm and Am chemical behavior.

e.g. Runde, W. 2000. "The Chemical Interactions of Actinides in the Environment". In Challenges in Plutonium Science, Vol II. Los Alamos Science, No. 26. LA-UR-00-4100. Los Alamos, MN: Los Alamos National Laboratory. pp 392-411.

Paul
