Subject: **Comments on Proposed Rulemaking Regarding Emergency  
Preparedness (74 FR 23254, May 18, 2009)**

The U.S. Nuclear Regulatory Commission (NRC) published an advanced notice of proposed rulemaking (ANPR) in the Federal Register on March 18, 2009 (74 FR 23254). The ANPR requested comments from all interested persons regarding whether to change the Emergency Preparedness requirements affecting all operating nuclear power plants as well as any future plants. The proposed rule would limit the duties of a plant's onsite emergency responders and require licensees to incorporate hostile actions scenarios into drills and exercises. Additionally, the proposed rule would incorporate new requirements for back-up measures for alerting and notification systems.

PSEG Nuclear, LLC has reviewed the proposed rulemaking and fully endorses the comments submitted to the agency by the Nuclear Energy Institute under cover letter dated October 19, 2009.

If you have any questions please contact Mr. Dave Burgin of my staff at (856)339-1595.

Sincerely,

Thomas P. Joyce
