Subject: Severe Accident N&S Evaluation Call Information

Dale,

Below are the three topics that will be discuss tomorrow.

1. Provide a discussion of the process and logic that leads to the conclusion that the change in reactor design is not significant.
2. Provide input and output files for the MACCS2 code if the consequence assessments for AP1000 reactor severe accidents have been updated since those considered in the ESP EIS.
3. Provide a discussion of the impacts of changes in the AP1000 design since DCD Revision 15 on Severe Accident Mitigation Alternatives.

Thanks
