Rodney A. Dunseath, D.O.
Radiation Safety Officer
Clarian Arnett Health System, Inc.
5165 McCarty Lane
Lafayette, IN 47905

Dear Dr. Dunseath:

Enclosed is Amendment No. 05 to your NRC Material License No. 13-32535-02 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9892 so that we can provide appropriate corrections and answers.

In correspondence dated July 1, 2009, and July 2, 2009, you requested release for unrestricted use locations at 1116 North 16th Street and 2600 Greenbush Street both located in Lafayette, Indiana. The NRC staff has reviewed your final status surveys. Based on its review, the staff has concluded that all licensable radioactive material has been removed from your former storage location and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Based on these conclusions no further remediation or actions with respect to NRC regulated material is required for this storage location and it is suitable for unrestricted use.

This also refers to the telephone conversation between your consultant, Erin Bell, and me on September 18, 2009, regarding the Profile/C.Clear Attenuation Correction System sealed sources in Subitem No. 6D of your license. 10 CFR 35.65(a) and 10 CFR 35.65(b) authorized the possession and use of the sources. Therefore, Subitem Nos. 6D through 9D, inclusive, do not need to be listed on your license and were removed. If my understanding is incorrect in this matter, please contact me immediately at 630-829-9892.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

R. Dunseath

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

A handwritten signature in black ink that reads "Jose Macatangay". The signature is written in a cursive style with a large, sweeping initial "J".

Jose D. Macatangay
Materials Licensing Branch
