October 15, 2009

Mr. James Kottan
NRC Region I
475 Allendale Road
King of Prussia, PA 19406-1415

Dear Mr. Kottan:

RE: Program Improvement Plan - Update #10

Enclosed is the tenth update of our Program Improvement Plan, submitted as required by the heightened oversight process. Following are the changes since our last update, of April 26, 2009:

- We have completed a draft of the express terms (regulatory text), supporting documents, and our initial outreach effort for adopting our version of the license termination rule (6NYCRR Part 384). With respect to the public outreach effort, we have finalized the formal response document to public comments received. Review of the express terms by counsel's office has been completed, and internal review by affected Divisions within the Department will begin shortly.
- We have extended our anticipated date of final adoption of Part 384 by five months, to September 2010. Whenever possible, we will try to compress the work schedule over the next few months.
- Work on the amendments to Part 380 is proceeding. A preliminary draft of the express terms was completed, undergone legal review, and management review. We are now preparing for our initial public outreach efforts. Due to competing priorities, we have extended our anticipated date of final adoption of the amendments by several months, to the Summer of 2011.

As we explained in our January 31, 2006 letter, we recognize the need to adopt these regulations, but our delay in doing so has not impaired DEC's ability to protect the environment or the public from radiation hazards.

We look forward to discussing the status of our Program Improvement Plan items during our next heightened oversight conference call, scheduled for 10 a.m. on October 30. If there are any questions on our updated plan, please contact me.

Sincerely,

A handwritten signature in cursive script that reads "Sandra Hinkel".

Sandra Hinkel
Chief, Radiation Control Permit Section
