Reference NRC application XW016

Dear Ms Owens:

Thank you for the opportunity to comment on the ETI application for NRC license XW016 described in your letter dated October 19, 2009, with attachments. Our review indicates that the information concerning processing of this material in Tennessee is consistent with the activities that the division has licensed Impact Services to perform. Thus, we have no objection to the issuance of this license.

Please confirm receipt of this information at your convenience.

Johnny C. Graves
Licensing, Registration, and Policy Manager
Division of Radiological Health
Tennessee Department of Environment and Conservation
