Subject: Industry buried pipe program basis

The Industry buried pipe program basis is in EPRI Report #1016456, dated December 2008.

The recent buried pipe and tank monitoring program is an EPRI effort that is an offshoot of the EPRI Balance of Plant Erosion / Corrosion programs.

I have requested the library (Charles Gordy) to get a copy of EPRI Report #1016456 but that may be a problem as it is less than six months since issue.

Do you have a copy or know who does?

Harold Gray, 610-337-5325

Note - The next EPRI buried pipe/tank task group meeting is in Golde, CO in mid July.
