Re: GE Homeland Protection, Inc., License No. 20-23904-01E, Radioactive Sealed Source Device  
Certificate NR-0399-D-101-E

I write to request amendment of the subject license and certificate to take into account the changes described below:

- Effective October 1, 2009, GE Homeland Protection, Inc., the licensee, changed its name to Morpho Detection, Inc. I request that all references to GE Homeland Protection, Inc., be changed to Morpho Detection, Inc., on the subject license and certificate.
- Effective immediately, the licensee no longer distributes the Ion Mobility Spectrometer from 3211 Progress Drive, Lincolnton, NC 28092. Although this location was listed on the above license and certificate, at no time were any radioactive materials or products containing radioactive materials present at that site. The location was added to the license and certificate with the intent to distribute from the location in the future; however, the location is no longer available for use by the licensee, and I request that it be removed from the subject license and certificate.

No other changes are being made at this time. If you have questions or need additional information about this change, please call me at (978) 909.1238.

Sincerely,

Neil Walters
