

November 9, 2009

Mr. Evan Rosenbaum
Adjunct Project Manager
Holtec International
555 Lincoln Drive West
Marlton, NJ 08053

SUBJECT: HOLTEC INTERNATIONAL (HOLTEC), REQUEST FOR WITHHOLDING
INFORMATION FROM PUBLIC DISCLOSURE (TAC NO. L24210)

Dear Mr. Rosenbaum:

By letter dated September 1, 2009, Pacific Gas and Electric Company (PG&E) submitted an affidavit dated August 12, 2009, executed by you, requesting that the information contained in the following document be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR), Part 2, Section 2.390:

Holtec Report HI-2053376, revision 6, "Thermal Hydraulic Analysis for Diablo Canyon Site-Specific HI-STORM System Design" and accompanying CD-ROM with computer data files.

By letter dated October 27, 2009, PG&E submitted an affidavit dated October 21, 2009, executed by you, requesting that the information contained in the following document be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR), Part 2, Section 2.390:

Thermal Questions 3b, 3c, 3e, 4b and the associated PG&E responses from Enclosure 2 of PG&E letter DIL-09-006.

The affidavits stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- (a) Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by Holtec's competitors without license from Holtec International constitutes a competitive economic advantage over other companies.
- (b) Information which, if used by a competitor, would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing a similar product.

We have reviewed your applications and the material in accordance with the requirements of 10 CFR 2.390 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Therefore, the version of the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.390(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I may be reached at 301-492-3325.

Sincerely,

/RA/

John M. Goshen, P.E., Project Manager
