Name of Licensee: Hartford Hospital
Name of Participant(s): Peter Mas, RSO
Telephone No. 860-545-2676, pmas@harthosp.org
Subject: Additional information for amendment request

I contacted Peter to discuss the following, and provided it to him in an e-mail message:

- 1) A portion of Dr. Steger's training was provided by Michael Mills, who also signed a preceptor attestation. I tried to contact the RSO at University of Louisville to confirm that Mills is an HDR AMP under that license, but got no response. Please provide documentation such as copy of license or permit under broad license or letter from broad license RSO?
- 2) Has Guo-Xin Qian received training in your facility's HDR unit operation and emergency procedures?
- 3) The first 3 NARM uses listed in Item 3 should already be covered under 35.200 and 35.65, so there's no need to add them to the license. For Pd-103 seeds, we would usually add that model to the list of 35.400 sources. Is your current possession limit for 35.400 sources sufficient, or would you like to add an additional 500 mCi?
- 4) Do you have any facilities for NARM use for which we don't already have drawings on file? This could include PET or PET/CT scanning rooms, hot labs, quiet rooms, etc. Please submit diagrams, description of surrounding areas including above and below, and shielding information, including shielding design/calcs. If this information is not easily available, we could defer to another amendment, as long as you submit by Feb 7 (6 months after NARM waiver termination).

Action Required: Await response, then issue amendment
