

a threshold is believed to exist.

(cs) "NORM" means any naturally occurring radioactive material, and excludes byproduct, source, or special nuclear material.

(ct) "Nuclear facility" means any facility that uses radioactive material.

(cu) "Nuclear Regulatory Commission (NRC)" means the U.S. Nuclear Regulatory Commission or its duly authorized representatives.

(cv) "Occupational dose" means the dose received by an individual in the course of employment in which the individual's assigned duties for the licensee or registrant involve exposure to sources of radiation, whether or not the sources of radiation are in the possession of the licensee, registrant or other person, exclusive of dose received:

- (1) From background radiation;
- (2) As a patient from medical practices;
- (3) From voluntary participation in medical research programs; or
- (4) As a member of the public.

(cw) "Package" means packaging plus its radioactive contents as presented for transport.

(cx) "Person" means "person" as defined in RSA 125-F:3, XII, namely "any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, agency of this state other than the program, political subdivision of this state, any other state or political subdivision or agency, and any legal successor, representative, or agent of the foregoing, other than federal government agencies".

(cy) "Pharmacist" means "licensed pharmacist or pharmacist" as defined in RSA 318:1, II, namely, "when not otherwise limited, means a person holding a license under RSA 318:18 and who is, therefore, legally authorized to practice the profession of pharmacy in this state."

(cz) "Physician" means an individual licensed in this state to practice medicine.

(da) "Planned special exposure" means an infrequent exposure to radiation, separate from and in addition to the annual occupational dose limits.

(db) "Positive pressure respirator" means a respirator in which the pressure inside the respiratory inlet covering exceeds the ambient air pressure outside the respirator.

(dc) "Powered air-purifying respirator (PAPR)" means an air-purifying respirator that uses a blower to force the ambient air through air-purifying elements to the inlet covering.

(dd) "Pressure demand respirator" means a positive pressure atmosphere-supplying respirator that admits breathing air to the facepiece when the positive pressure is reduced inside the facepiece by inhalation.

(de) "Principal activity" means an activity authorized by the license which is essential to achieving the purpose(s) for which the license was issued or amended, and excludes storage during which no licensed material is accessed for use or disposal and activity incidental to decontamination or decommissioning.

(df) "Protective apron" means an apron made of radiation-attenuating materials used to reduce exposure to radiation.

(dg) "Public dose" means the dose received by a member of the public from exposure to sources of radiation from licensed or registered operators but does not include occupational dose, dose received from background radiation, dose received as a patient from medical practices, or dose from voluntary participation in medical research programs.

(dh) "Pyrophoric liquid" means any liquid that ignites spontaneously in dry or moist air at or below 130 F
