SUBJECT: REGULATORY HISTORY INDEX - LICENSE AND CERTIFICATE  
OF COMPLIANCE TERMS (10 CFR PART 72)

Enclosed is the regulatory history index of those documents of central relevance to the subject rulemaking. The ADAMS Accession number is provided for each document or package. The rulemaking would amend the regulations to enhance the effectiveness and efficiency of the licensing process for spent nuclear fuel storage. Specifically, they would clarify the term limits for dry storage cask Certificates of Compliance (CoCs) and independent spent fuel storage installation (ISFSI) specific licenses. The proposed amendments would also provide consistency between the general and specific ISFSI license requirements, and allow general licensees subject to these regulations to implement changes authorized by an amended CoC to a cask loaded under the initial CoC or an earlier amended CoC (a "previously loaded cask"). The title of the proposed rule was "License and Certificate of Compliance Terms" published in the *Federal Register* on September 15, 2009 (74 FR 47126).
