Attachments: ME1148 DuaneArnoldRAI (as issued) 2009-11-09.doc

The Nuclear Regulatory Commission (NRC) staff is reviewing your letter NG-09-0038 dated February 19, 2009, pertaining to the Spent Fuel Management Program and Preliminary Decommissioning Cost Estimate and requests some additional information (RAI). Attached is a list of the needed information. The RAI items are from our Financial Policy and Rulemaking Branch (PFPB). The reviewer from PFPB is Clayton (Larry) Pittiglio.

In a telephone discussion on November 5, 2009 between Tony Browning of the Duane Arnold Energy Center licensing staff and Karl Feintuch, the date for the requested response was determined to be 30 days from the date of this message. An earlier response, if practical, would be appreciated.

The attached RAI items are identical to the draft RAI list sent by email to Tony Browning in an email message on October 13, 2009 at 4:52 PM ET.

Note that the numbering of the RAI items has been retained by accounting for the deleted item No. 5. Further, the reviewer asked me to draw your attention to the need to provide the documented basis, as expressed in the last sentence of RAI No. 1. He expressed readiness to respond to a request to clarify the scope of the needed response should you see a need to do so.

I will forward the ADAMS Accession Number (ML#) corresponding to this Request when that information becomes available (typically, within a few days).

Karl Feintuch
