Tim,
If your intent is to keep this brief, then it reads fine with Pat's changes.

Subject: RE: TEDE

Tim,

I looked it over and think it looks pretty good given all the sensitivities. The only enhancements I will offer are 1) you could change the end of the FG12/ICRP sentence from "for external doses" to "for external dose calculations" to re-emphasize the focus of that discussion on calculated doses and 2) in the "monitoring" sentence you might consider using the term "Actual exposures" at the beginning as well as "measured" rather than monitored (in the text not necessarily in the title) to be more explicit. These are minor 'icing on the cake' comments and I don't believe they are essential.

Pat

Subject: TEDE

Jeff & Pat:

Attached is the brief (and I do mean brief) discussion on the TEDE. I have discussed this with Sami Sherbini and we believe the shorter the better. We believe the discussion provides the staff all they need to know to do the dose calculation. What do people think?

Tim
