

Reactor Operations Perspective on Construction Assessment

Frederick Brown
Director, Division of Inspection
And Regional Support
Office of Reactor Regulation

November 16, 2009
Rockville, Maryland

Keeping the End in Mind

New Reactors need to be delivered to the Operators with very high confidence that they will function as designed and analyzed.

The Importance of Construction Assessment

- Benefits of start-up Testing
- Limits of start-up Testing
- Addressing the gaps

Effective & Efficient Assessment

- Isolate poor performance
- Promptly focus attention
- Recognize successful resolution of problems
