

SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION

1. LICENSEE/LOCATION INSPECTED: PartTec, Ltd. 2620 N. Walnut Street, Suite 805 Bloomington, IN REPORT NUMBER(S) 2009-001		2. NRC/REGIONAL OFFICE U.S. Nuclear Regulatory Commission Region III 2443 Warrenville Road Suite 210 Lisle, Illinois 60532-4351	
3. DOCKET NUMBER(S) 040-09082	4. LICENSEE NUMBER(S) SUC-1592	5. DATE(S) OF INSPECTION October 22- 29, 2009	

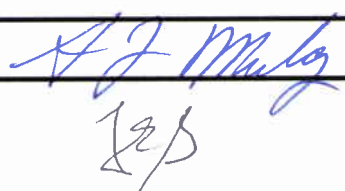

LICENSEE:
The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, NUREG-1600, to exercise discretion, were satisfied.

_____ Non-Cited Violation(s) was/were discussed involving the following requirement(s) and Corrective Action(s):
- 4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.
(Violations and Corrective Actions)

Licensee's Statement of Corrective Actions for Item 4, above.

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

PROGRAM SCOPE

This was an initial inspection.

On November 28, 2008, this license was initially issued in anticipation of the licensee using depleted uranium (DU) as shielding for security locks to mask lock tumblers against being observed through the use of radiography techniques in an attempt to reveal the lock combination. Subsequent to the license issuance, the licensee moved to a new location at 2620 N. Walnut, Suite 805, Bloomington, IN. Since the license was initially issued, the licensee has not obtained, possessed, used or stored DU.

During the inspection, visual as well as confirmatory verification surveys performed by the inspector of the current and the former 320 W. 8th Street, Suite 101, Bloomington, IN, locations did not reveal the presence of DU.

On October 29, 2009, the licensee submitted an NRC Form 314 "Certificate of Disposition of Materials", requesting termination of License No. SUC-1592, since no licensed material had been possessed or used and no future plans to obtain DU were anticipated. The termination request is currently under review by the Materials Licensing Branch.
