

SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION

1. LICENSEE/LOCATION INSPECTED: Albany International Corp. At: National Mini Storage 5169 KL Avenue, Kalamazoo, Michigan REPORT NUMBER(S) 2009-001		2. NRC/REGIONAL OFFICE Region III U.S. Nuclear Regulatory Commission 2443 Warrenville Road, Suite 210 Lisle, Illinois 60532-4351	
3. DOCKET NUMBER(S) 030-35604	4. LICENSEE NUMBER(S) 29-32289-01	5. DATE(S) OF INSPECTION October 27, 2009	

LICENSEE:
 The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

1. Based on the inspection findings, no violations were identified.

2. Previous violation(s) closed.

3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, NUREG-1600, to exercise discretion, were satisfied.

_____ Non-Cited Violation(s) was/were discussed involving the following requirement(s) and Corrective Action(s):

4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.
 (Violations and Corrective Actions)

Licensee's Statement of Corrective Actions for Item 4, above.

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

PROGRAM SCOPE

The site contact in Kalamazoo, MI, was Mark Rozek, gauge user, at 269-806-5627.

The licensee was a national company that performs maintenance and troubleshooting at paper mills throughout the United States. This license authorized storage locations in Kalamazoo, Michigan, and Tell City, Indiana. From the storage location in Kalamazoo, the licensee possessed and used one portable gauge with two sources as authorized on the license. The gauge was used by two authorized users in Michigan and northern Indiana around two to three times monthly. The gauge was secured in accordance with 10 CFR 30.34(i) both in the storage area and in vehicles when unattended. The licensee did not perform any service or maintenance activities on the gauge. License personnel knew where to obtain a survey instrument if needed during an emergency situation.

Performance Observations

The gauges were not in use at the time of the inspection. The inspector observed gauge storage at the licensee's facility, and licensee personnel demonstrated gauge use, transport, and storage in a vehicle, and explained emergency procedures. The inspector identified no concerns with these activities. Interviews with licensee personnel indicated adequate knowledge of radiation safety procedures and policies. Surveys of the gauge storage area indicated radiation levels appropriate for unrestricted areas and consistent with licensee postings.
