Nancy Sopko (Legal Assistant for US Congressman Adler),
It was a pleasure to meet you last night at the Exelon sponsored "Community Information Night". As requested, I have attached the links to some recent NRC resident inspection reports so you can gain an understanding of the variety of areas we view. These reports are generated quarterly and are publically available on the NRC web page.

I have also included the web link to NRC document NUREG-1649 which provides a very good summary of the reactor oversight process that is utilized at all nuclear power plants in the US.

If you have any further questions please feel free to contact me at any time.
