Gene Aloise
Director, Natural Resources
and Environment
Government Accountability Office
441 G St., NW
Washington, D.C. 20548

Dear Mr. Aloise:

This letter is in response to your November 16, 2009 request to Mr. Bill Borchardt, the U.S. Nuclear Regulatory Commission's (NRC's) Executive Director for Operations, for agency comments on the draft Government Accountability Office (GAO) report "Managing Sensitive Information: Actions Needed to Prevent Unintended Public Disclosures of U.S. Nuclear Sites and Activities" (GAO-10-251). The NRC has no objections to the report; however, the agency suggests the following editorial change for GAO's consideration for incorporation in the final report.

At the bottom of page 4 and top of page 5, under the Background section, we recommend that the current language "… and exports of sensitive and other key nuclear-related equipment" be modified to read "… and exports of specific nuclear-related equipment." We believe that this change would indicate to the reader that the nuclear-related equipment being reported is equipment specified by the International Atomic Energy Agency to be reported and not just equipment that the U.S. might consider as sensitive or key.

The NRC appreciates the opportunity to comment on GAO-10-251.

Sincerely,

/RA/

Martin J. Virgilio
Deputy Executive Director for Materials, Waste,
Research, State, Tribal and Compliance Programs
Office of the Executive Director for Operations
