

To: Nuclear Regulatory Commission  
Re: Depleted Uranium Disposal Rulemaking

Until the NRC is able to provide a clear description of "other unique waste streams," it must not attempt to formulate rules governing their disposal.

Instead, the NRC should focus on reevaluating its decision that shallow land burial is adequate for depleted uranium disposal.

To: Nuclear Regulatory Commission  
Re: Depleted Uranium Disposal Rulemaking

Until the NRC is able to provide a clear description of "other unique waste streams," it must not attempt to formulate rules governing their disposal.

Instead, the NRC should focus on reevaluating its decision that shallow land burial is adequate for depleted uranium disposal.
