Ops Officer : MARK ABRAMOVITZ
Entry Date : 12/6/2007 - 12:02
Entry Type : 50.72 LOGGED ONLY
Notify Date - Time : -
Event Date - Time : - ()
Site : SALEM
Emergency Class :

"At approximately 0950 on November 28, 2007 a deceased sturgeon was removed from the
Circulating Water System (CWS) Intake trash racks at the Salem Generating Station. The
sturgeon was identified by site biological experts as an Atlantic Sturgeon, and therefore not an
"endangered species. While examining the carcass, an identification tag was found. The tag
manufacturer was contacted at approximately 10:00. On December 5, 2007 at 14:46 the owner
of the tag contacted the station for a follow-up. When tagged in 2002 the sturgeon was identified
as a Shortnose Sturgeon (Acipenser brevirastrum). Shortnose sturgeon are federally listed as
'endangered' species under the Endangered Species Act of 1973, as amended. Under the
incidental take statement and Salem NPDES permit this requires a 24-hour call to New Jersey
Fish and Wildlife and the National Marine Fisheries Service. The state of NJ has been notified
on December 6, 2007 at 10:54. Therefore, this event is reported to NRC within the 4-hour
requirement of 10CFR50.72(b)(2)(xi). The NRC resident inspector has been notified."

Notified "Endangered Species" via E-mail.
