Emergency Class :

Received a call from SCE San Onofre Compliance Engineer, Susan Gardner, (949) 368-6223, regarding a live green sea turtle.

"At about 2155 PST on November 29, 2007, Southern California Edison (SCE) discovered a live green sea turtle in the SONGS Unit 3 intake structure (fish handling system). The turtle, which appeared healthy, was removed from the intake structure. SCE photographed and tagged the turtle and obtained a blood sample.

"In accordance with the SONGS Turtle Take Permit, SCE provided a notification to the National Marine Fishery Services (NMFS) of this occurrence at about 0755 PST on November 30, 2007. As discussed with NMFS, SCE will be releasing the turtle north of the plant later today. SCE is providing this notification to the NRC in accordance with 10 CFR 50.72 (b) (2) (xi).

"At the time of this occurrence, Unit 3 was operating at about 100% power. Unit 2 is shutdown for refueling. The NRC Resident Inspector has been notified of this occurrence and will be provided a copy of this report."

Notified the NRC HQ Endangered Species Office (via email) and the R4DO (Pick).
