SUBJECT: COLUMBIA GENERATING STATION - NRC SECURITY INSPECTION  
REPORT 05000397/2009403

Dear Mr. Parrish:

On October 23, 2009, the U.S. Nuclear Regulatory Commission (NRC) completed a security baseline inspection at your Columbia Generating Station. The inspection covered one or more of the key attributes of the security cornerstone of the NRC's Reactor Oversight Process. The enclosed inspection report documents the inspection results, which were discussed on October 8, 2009, with Mr. S. Oxenford, Vice President, Nuclear Generation/Chief Nuclear Officer, and other members of your staff. On October 23, 2009, the final inspection results were telephonically presented to Mr. G. Cullen, Manager, Regulatory Programs, and other members of your staff.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel.

This report documents one finding of very low security significance (i.e., Green as determined by the Physical Protection Significance Determination Process). The deficiency was promptly corrected or compensated for, and the plant was in compliance with applicable physical protection and security requirements within the scope of this inspection before the inspectors left the site. Additionally, a licensee identified violation which was determined to be of very low security significance is listed in this report (Section 4OA7). However, because of the very low security significance and because they are entered into your corrective action program, the NRC is treating these violations as non-cited violations (NCVs) consistent with Section VI.A.1 of

The finding had a crosscutting aspect in the area of Human Performance associated with decision making, because the licensee did not effectively communication decisions and the basis for decisions in order for individuals to perform in a timely manner (H1.c). If you disagree with the characterization of the finding in this report, you should provide a response within 30 days of the date of this inspection report, with the basis for your disagreement, to the Regional Administrator, Region IV, and the NRC Resident Inspector at Columbia Generating Station. The information you provide will be considered in accordance with Inspection Manual Chapter 0305.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's document system, (ADAMS). In accordance with 10 CFR 2.390(b)(1)(ii), the NRC is waiving the affidavit requirements for your response, if any.
