Mr. Hayes,

I understand there is a controversy in Hawaii with the military and Depleted Uranium. I have read many articles that explain the problem of finding DU at different sites and I am quite concerned that the military does not see this as a problem, and understand their responsibility in cleaning these sites.

Depleted Uranium can be very hazardous to humans and must be seen as a health concern. I would urge you to rule in favor of having the military complete their responsibility to the people of Hawaii, be good stewards of the land and the people who live here.

Thank you for your consideration.
