**SUBJECT: TERMINATION OF YOUR NRC RADIOACTIVE MATERIALS LICENSE  
(BPB Manufacturing, Inc.)**

Dear Mr. Gwynn:

In the NRC FORM 314, Certificate of Disposition of Materials, dated September 11, 2009, with supporting documents, you requested that we terminate your NRC radioactive material license, License Number 13-11278-02 (expiration date of July 31, 2013). The subject license authorized use of licensed material in the form of fixed gauges at your former BPB Manufacturing facilities located at 1400 West Main Street, Lagro, Indiana. The NRC staff has reviewed the information provided in that Certificate of Disposition, the supporting documents submitted with that certificate, and our phone conversation on November 16, 2009, and we have concluded that no leaking sealed source were ever possessed by you, based on routine leak test data (copies of the most recent data provided with the termination request). Further we conclude, based on the information provided, that all licensable radioactive material has been removed from your facility and transferred to other licensed recipients.

Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required for License Number 13-11278-02 and your facilities located at 1400 West Main Street, Lagro, Indiana. Further, we conclude that the subject facilities meet NRC criteria for release for un restricted use and termination of NRC License Number 13-11278-02. Accordingly, an amendment is enclosed, terminating your NRC License Number 13-11278-02, as requested.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's

T. A. Gwynn
