Thomas A. Gwynn Controller	CertainTeed Ceilings Formerly, BPB Manufacturing, Inc. Fax 1400 Main Street Lagro, IN 46941	610-341-6894 -7777

SUBJECT

Control No. 318507 -- Re - Amendment request by NRC Form 314, Certificate of Disposition of Materials dated September 11, 2009, signed by Thomas A Gwynn, Controller, with attached documents. These documents confirmed final disposition of fixed gauges with contained sealed sources to other licensed recipients and included copies of recent leak test documents confirming the non-leaking status of the sealed sources, and requested termination of their NRC license, License No. 13-11278-02.

SUMMARY

In a telephone conversation with Mr. Gwynn on this date, he stated that the BPB Manufacturing, Inc. plant, located at 1400 West Main Street, Lagro, Indiana 46941 was not in operation when it was purchased by CertainTeed Corporation, Ceilings Division, in December 2005 and has never been in operation since that time. Records (submitted with the license termination request) signed by Arnold Cly, Plant Manager and Radiation Safety Officer (RSO) at the time the subject records were generated, shows that the three Nuclear Research Corporation (formerly Industrial Nucleonics) Model SH-302 fixed gauges each containing a sealed source of Cs-137, with a nominal activity of 0.5 curies, were disposed of by transfer on January 22, 2009, by and to a licensed recipient, Applied Health Physics, Bethel Park, Pennsylvania and subsequently for disposal to ThermoFisher Scientific at Sugar Land, Texas, under Texas Radioactive Material License LO3524. Leak test records submitted with the license termination request show that the CS-137 sealed sources in all three of the gauges had been wipe tested on either December 15 or 16, 2008, by Mr. Cly and analyzed by Applied Health Physics on December 19, 2008, confirming the non-leaking status of all three sealed sources. Mr. Gwynn stated that Arnold Cly, former Plant Manager and RSO has retired, since the disposition of the sealed sources, the only licensed material authorized and possessed under the subject license. Further, Mr. Gwynn confirmed that to his knowledge, the routine leak test analyses of the sealed sources, has never identified any leaking sealed sources. Mr. Gwynn stated that the amendment terminating the license and any future correspondence related to the subject license should be mailed to his attention at CertainTeed Corporation, P.O. Box 860, Valley Forge, PA 19482.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this conversation record will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

ACTION REQUIRED

License reviewer will consider the above information in evaluation of subject license termination request.
