Director
Office of Nuclear Material Safety and Safeguards
U. S. Nuclear Regulatory Commission
Washington, DC 20555

ATTENTION: Document Control Desk

SUBJECT: Material Receipt Verification

REFERENCE: (1) Docket 70-143; SNM License 124
(2) NRC approval letter dated April 14, 2009 (TAC L32806)

Dear Sir:

A temporary Safeguards License Condition SG-4.34 was issued to Nuclear Fuel Services, Inc. (NFS) by Amendment 87 (reference 2). This license condition automatically expires on April 30, 2010. The scheduling issues related to the transport of SSNM and the need for the license condition for 2010 are the same as for shipments from 2004 through 2009. Due to the limited availability of secure transport, NFS must provide the capability to accommodate larger quantities of material in each shipment and receive shipments in a compressed time frame. To meet these objectives, NFS requests the license condition be extended another year to allow the additional time that is necessary to perform the gross weighing work associated with the larger shipment quantities.

If you or your staff have any questions, require additional information, or wish to discuss this, please contact me, or Mr. Clayton Brown, Materials Manager, at 423-735-5535. Please reference our unique document identification number (30G-09-1036) in any correspondence concerning this letter.

Sincerely,

NUCLEAR FUEL SERVICES, INC.

B.M. Moore
