Good morning Mary,

No problem, see attached pages 5 - 7a of the 2003 renewal revised as of today.

Eric

Sorry Eric, (If I could remember everything at once my life would be much more efficient)
Please add the new plutonium materials to pages 5-7 also. It's OK to create a page 7a.

Mary

Hello Mary,

As we discussed a few minutes ago, please revise the amendment to NRC license SNM-95 that Penn State University submitted dated October 9, 2009. Please change the physical form from "any" to "non-dispersable materials".

Also, as you requested below, I have revised and marked up pages 5 - 7 of the initial application .

Eric

Hi Eric,

Can you please revise pages 5 of 23 through 7 of 23 of the May 22, 2003, renewal application to remove the Pathfinder elements, source material, and natural uranium? Condition 10 refers to the application so it should reflect the amended possession limits.

I'm drafting amendment 1 to remove those materials without adding the new plutonium materials until we've made a decision on those materials. If we can resolve the material form and handling procedures issues efficiently, maybe I can put everything into this one amendment.

Thanks,
Mary
