

BEFORE THE UNITED STATES
NUCLEAR REGULATORY COMMISSION

In the Matter of)

POWER AUTHORITY OF THE STATE OF NEW YORK)

) Docket No. 50-286

Indian Point 3 Nuclear Power Plant)

APPLICATION FOR AMENDMENT TO
OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission (NRC), the Power Authority of the State of New York, as holder of Facility Operating License No. DPR-64, hereby applies for an Amendment to Appendix A of the Operating License (Technical Specifications) Section 6.5.2, "Safety Review Committee (SRC)." The proposed changes make the Safety Review Committee (SRC) reportable to the Senior Vice President - Nuclear Generation. Previously, the SRC reported to the President and Chief Operating Officer. This realignment of responsibility unifies nuclear related matters under a single Nuclear Generation Department. Similar changes to Appendix B (Environmental Technical Specifications), Figure 5.2-2 on page 5-8 are also included. In addition the titles of the SRC members have been changed to reflect the recent Authority headquarters office reorganization. The SRC quorum has been changed to agree with the Commission's standard technical specifications.

The proposed change to the Technical Specifications is presented in Attachment I to this Application. The Safety Evaluation is included in Attachment II.
