Attention: Mr. Steven A. Varga, Chief
Operating Reactors Branch No. 1
Division of Licensing

Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
Proposed Changes to the Technical Specifications
Related to Main Turbine Steam Stop and Control
Valves Testing

Dear Sir:

Enclosed for filing are three(3) signed originals and nineteen (19) copies of a document entitled, "Application for Amendment to Operating License", together with forty (40) copies of Attachments I and II thereto, comprising a statement of the proposed changes to the Technical Specifications and the associated Safety Evaluation.

This application seeks to amend Table 4.1-3, "Frequencies for Equipment Tests", of Appendix A to the Operating License, on a one-time basis only, to provide a revised due date for performing the monthly main turbine steam stop and control valves test. It is proposed that this test, required to be performed by March 23, 1982, be conducted after this date but no later than March 31, 1982. This temporary amendment is requested only for the Cycle 3 end of core life.

Appl 5/11 w/check \$1,200

The proposed page change to the Technical Specifications is contained in Attachment I to the Application for Amendment of the Operating License enclosed with this letter. The Safety Evaluation for the proposed changes to the Technical Specifications is contained in Attachment II to the Application for Amendment.

The Authority has classified this Application for Amendment to the Operating License as Class II as it is administrative in nature. Enclosed is a check in the amount of \$1,200 as the filing fee per 10CFR170.22, which the Authority pays under protest pending a final determination of the legality of the fee schedule.

Very truly yours,

J.P. Bayne
Senior Vice President
Nuclear Generation
