Docket No. 50-286  
Proposed Changes to the Technical Specifications  
Regarding Administrative Control

Dear Sir:

Enclosed for filing are three (3) signed originals and nineteen copies of a document entitled "Application for Amendment to Operating License," together with forty (40) copies of Attachments I and II thereto, comprising a statement of the proposed changes to the Technical Specifications and the associated safety evaluation.

This application seeks to amend portions of Section 1 ("Definitions") and Section 6 ("Administrative Controls") of the Technical Specifications commensurate with Generic Letter No. 83-43 ("Reporting Requirements of 10 CFR Part 50, Sections 50.72 and 50.73, and Standard Technical Specifications") dated December 19, 1983 pertaining to the recently promulgated LER and emergency notification rules. In addition, this application seeks to amend Figure 6.2-2 to more accurately reflect plant organization and also seeks to amend the Safety Review Committee's membership composition. It is requested that the changes proposed in Attachment I be coordinated where applicable with the additional changes proposed for certain of the Attachment I pages in the Authority's June 4, 1982 (IPN-82-43), July 21, 1982 (IPN-82-55), March 8, 1983 (IPN-83-21), May 3, 1983 (IPN-83-34), September 30, 1983 (IPN-83-84), and February 17, 1984 (IPN-84-06) submittals.

As indicated in Generic Letter No. 83-43 the proposed technical specification changes related to the new LER rule do not require a license fee. However, the Authority interprets

the additional changes proposed by this application to constitute a Class II amendment as defined in 10 CFR 170.22. Enclosed, therefore, is a check in the amount of \$1200 which the Authority is paying under protest pending resolution of the legality of the fee schedule.

In accordance with the requirements of 10 CFR 50.91, a copy of this "Application for Amendment to Operating License" and attachments thereto is being submitted to the designated New York State Official.
