Mr. Harold R. Denton
Director of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
1984 Annual FSAR Update

Dear Sir:

Pursuant to 10 CFR 50.71(e), the Indian Point 3 FSAR has been updated to accurately present changes made during the one year period ending January 22, 1984, necessary to reflect information and analyses submitted to the Commission or prepared pursuant to Commission requirement. Enclosed herewith are thirteen (13) copies of the replacement pages reflecting these changes. Each replacement page is marked with the date of revision and revision number, which indicates the number of times that page has been revised. The revisions are indicated by a solid bar appearing in the right hand margin. A revision bar at the bottom of a page identifies those pages presenting unchanged text which has been relocated due to preceding additions or deletions.

Pursuant to 10 CFR 50.54 (a) (3), FSAR Chapter 17 is being revised in order to provide a current description of the quality assurance program. These changes do not reduce the commitments in the program description previously transmitted via the Authority's letter dated June 10, 1983 (IPN-83-57).

Should you or your staff have any questions regarding this matter, please contact Mr. P. Kokolakis of my staff.

Very truly yours,

A handwritten signature in cursive script, appearing to read 'J. P. Bayne'.

J. P. Bayne
