Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
Proposed Changes to Technical Specifications
Regarding Safety-Related Snubbers

References: 1. NRC Generic Letter 84-13, "Technical
Specification for Snubbers," dated May 3, 1984.

Dear Sir:

This application for amendment to the Indian Point 3 Technical Specifications seeks to delete the listing of safety-related snubbers (Table 3.13-1) while maintaining their operability and surveillance requirements. This change, in accordance with Reference 1, will eliminate the need for frequent Technical Specification Amendments to incorporate changes in snubber listings.

Enclosed for filing is the signed original of a document entitled, "Application for Amendment to Operating License," together with one copy of Attachments I and II thereto, comprising a statement of the proposed changes to the Technical Specifications and the associated Safety Evaluation.

In accordance with 10 CFR 170.12, a check in the amount of \$150.00 is enclosed as payment of the application fee for the review of these proposed changes to the Technical Specifications.

In accordance with 10 CFR 50.91, a copy of this application and the associated attachments are being submitted to the designated New York State Official.
