Indian Point 3 Nuclear Power Plant)

APPLICATION FOR AMENDMENT TO
OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission (NRC), the Power Authority of the State of New York, as holder of Facility Operating License No. DPR-64, hereby applies for an Amendment to the Technical Specifications contained in Appendix A of this license.

This application seeks to delete snubber listing Table 3.13-1 (Sheets 1-8), and to amend Sections 3.13 (1-3), 4.11 (A, B, C) and 6.10.2 to reflect this deletion. Criteria specifying which snubbers are required to be operable have been added to the aforementioned Sections. The purpose of these administrative changes is to reduce the need for frequent Technical Specification Amendments to incorporate changes in snubber listings.

The proposed changes to the Technical Specifications are presented in Attachment I to this application. The Safety Evaluation corresponding to this change is included in Attachment II.
