**Subject: Schedule for Submittal and Review of Revisions to WCAP-16097-P-A, Rev. 0 and WCAP-16096-NP-A, Rev. 1A**

This letter informs the Nuclear Regulatory Commission (NRC) of Westinghouse Electric Company's (Westinghouse) intention to submit revisions to the Westinghouse Common Qualified Platform topical report and software program manual and Westinghouse's requested schedule for NRC review of these documents.

On May 12, 2009, representatives of Westinghouse Repair, Replacement and Automation Services (RRAS) met with the NRC staff to discuss proposed modifications and justifications for changes to WCAP-16097-P-A, Revision 0, "Common Qualified Platform Topical Report" and WCAP-16096-NP-A, Revision 1A, "Software Program Manual for Common Q Systems." These modifications are a result of evolving platform and process changes based on customer project experience and recent guidance from digital instrumentation and controls task working groups. At a subsequent meeting on October 19, 2009, Westinghouse described plans to submit the revised Common Q topical report and software program manual in April 2010 and requested that the staff complete its review by April 2011. This letter confirms Westinghouse's submittal schedule of April 2010 and requests the NRC's concurrence that regulatory review will be scheduled for completion by April 2011.

Please contact either Mark Stofko (860-731-6652) or Jim Gresham (412-374-4643) if discussion of Westinghouse's submittal or requested review schedule is required.

Very truly yours,

J. A. Gresham, Manager  
Regulatory Compliance and Plant Licensing
