

**New Cogema Mining, Inc. Management Level Personnel Experience
Exhibit 4 of September 18, 2009 Notice of Change of Control Application**

Senior Vice President, ISR Operations

Incumbent: Donna Wichers

Ms. Wichers has over 31 years of experience in the uranium mining industry including ISR uranium operations and Title II uranium mine/mill decommissioning and mill tailings reclamation.

- Over 11 years of direct management of ISR project development, production operations, decommissioning, groundwater restoration and reclamation (General Manager, Cogema Mining, Inc.; Senior Vice President, ISR Operations for Energy Metals Corporation and Uranium One Americas).
- Over 9 years of direct management of Title II uranium mine/mill and mill tailings decommissioning and reclamation (General Manager, Pathfinder Mines Corporation), combined with management of above ISR operations.
- Over 20 years experience in management of regulatory affairs, environmental protection programs, groundwater restoration programs, state and federal licensing and permitting for various new and operational ISR uranium mines.

Operations Manager

Position not filled at present.

Manager, Environmental and Regulatory Affairs, Wyoming

Incumbent: Jon Winter

Mr. Winter has over 24 years of environmental health & safety experience in the mineral extraction industry.

- Over 4 years of experience in radiation safety and environmental protection program management (in situ recovery) at a uranium fuel cycle facility. Areas of responsibility included environmental health and safety employee training, compliance coordination of license conditions and regulatory requirements, reporting obligations including SERPs, management and implementation of corrective actions program, and implementation of EH&S Management System.
- Over 20 years experience in environmental health and safety program management related to large-scale hard rock mining operations. Areas of responsibilities included;
 - Acquiring of all necessary permits and approvals for a large-scale surface gold properties.
 - Management of environmental health and safety compliance programs at operating mining facilities.
 - Permit development for NRC, CAA, CWA, CERCLA, SARA, ESA, NEPA (EA's & EIS's), MSHA, HPA, and UIC administered programs.
 - Conducting site audits, risk assessments, inspections and due diligence at domestic and international properties.
 - Conducting or oversee baseline studies in support of permit application development.

Vice President, Safety, Health, and Environment/Corporate Social Responsibility

Incumbent: Mike Griffin

Mr. Griffin has over 35 years of experience in the nuclear industry including the U.S. Navy Nuclear Program, power reactor radioactive waste management, environmental remediation, and uranium mining operations.

- Over six years of radioactive waste management experience at power reactor utilities located across the U.S. involving the supervision of liquid waste treatment, decontamination, solidification, transportation, and disposal projects.
- Over seventeen years of radiation safety and environmental protection program management related to uranium fuel cycle facilities including Title I uranium mills (UMTRA Program), Title II uranium mills, and in situ uranium recovery facilities. This experience included eight years managing the environmental and radiation safety programs at the Crow Butte Uranium Project.
- Ten years of direct operations management experience related to environmental remediation projects, including responsibility for environmental, health, and safety programs. Projects included the Denver Radium Superfund Project and multiple remediation projects at industrial, mining, Department of Energy, Department of Defense, and NRC-licensed sites.
